

DIONE

Safety and Technological excellence in an ideal combination.

The DIONE series is an ideal combination of safety and technological excellence. It is specially configured for easy identification of the area from which the alarm originates. Its elegant design and technological superiority place it at the top. DIONE owns a high degree of certification and also meets the strictest security specifications (Grade 3). It is a unique product of Sigma Security which guarantees top security in the protected area of the user, while offering an integrated service in the field of Security Systems. DIONE was designed by a team of Greek engineers and is produced entirely in Greece. It is covered by a 2-year performance guarantee like all the Sigma Security products.

Technical Specifications	DIONE
Power Supply	13.2-14.5 V DC
Operational Voltage	13.8 V DC
Consumption (Standby MODE)	8 mA
	13.0 mA when the LEDs turn on at standby mode
Consumption (Alar MODE)	1.2 A max only sound, 1.35 A max when the FLASH turns on
Low battery voltage output	When the battery voltage is below 11.5 V DC
Accustic power	122dB at 1 meter
Maximum alarm duration	15 minutes
TAMPER contact	On the cover and on the wall
Protection Rate	IP 44
Battery (Pb)	12 V /1.3 Ah
Siren housing and flash material	Polycarbonate
Weight (without battery)	1280 gr
Dimensions	190 x 290 x 65 mm
