

PS-5

New Power Supply from Sigma Security!

Sigma Security introduces the new PS 5 power supply, a reliable and state-of-the-art switching power supply, certified with GRADE 3, for use in alarm and CCTV systems.

Available in two different versions to meet your needs:

- **PS 5U:** General-purpose power supply, suitable for various applications, with a USB port for easy programming with the S LOAD or S LOAD Lite software.
- **PS 5SB:** Network power supply, with S BUS output, to connect to the BUS of the S PRO & AEOLUS panels. Open Collector (O.C) outputs for power failure, overcurrent or output short circuit, low battery voltage.

It is equipped with four programmable power outputs, with electronic protection against overcurrent and short circuit in each output. Possibility to program the current of each output separately.

Finally, the PS 5 power supply is certified with GRADE 3, ensuring a high level of security for your system.
